

Diagnosis
„cancer“:
what can we
do?

Case of metastatic breast cancer

- **Treated by:**

Dr. Waibel Thomas, Orselina, Switzerland

- **Supervised by:**

Dr. Spinedi Dario, Orselina, Switzerland

Paragraph 3 of the Organon

„ If the physician clearly perceives what has to be cured in each individual case of disease (knowledge of the disease“

Paragraph 3 means:

- We have to find:

What has to be treated, or which are the **most urgent symptoms** to be treated?

a) mental: fear, depression despair, shock caused by diagnosis ?

b) physical: pain, bleeding, inflammation, side effects of chemo- or radiotherapy (or of other drugs), operations?

We come now to our case !

Clinical report:

Metastatic cancer of mammae

Mrs. S., born 1960

1994 Diagnosis: cancer of mamma pT2, N0 (0/10), M0

Operation of the lump with partial axilla dissection, chemotherapy (3 cycles CFU) and radiation

2000 Local recurrence

Operation of the local metastasis,
Starting of the homoeopathic treatment by a doctor in Germany

2002 Local recurrence

Amputation of the right mamma

2007 Restaging with multiple metastasis

Many local metastasis – ulceration of the tumor

Bone metastasis – sternum and ribs

Metastasis of lungs with infiltration of the pleura

Liver metastasis

Metastasis of the surrenales

06.05.2007

Paragraph 3 of the Organon

- In our case we have **two main acute problems:**

a) mental : strong anxiety

b) physic: treatment of the inflamed wound

- **Beginning of the cure in the *Clinica Santa Croce Orselina***

***Applications of Calendula
mother tincture (10 drops in a dl water)
on the wound***

Calendula

Mother tincture for treatment of the wound

Analysis of the Arsenicum reptorisatio

As we can see, not all the rubric are covered by **Arsenicum album**.

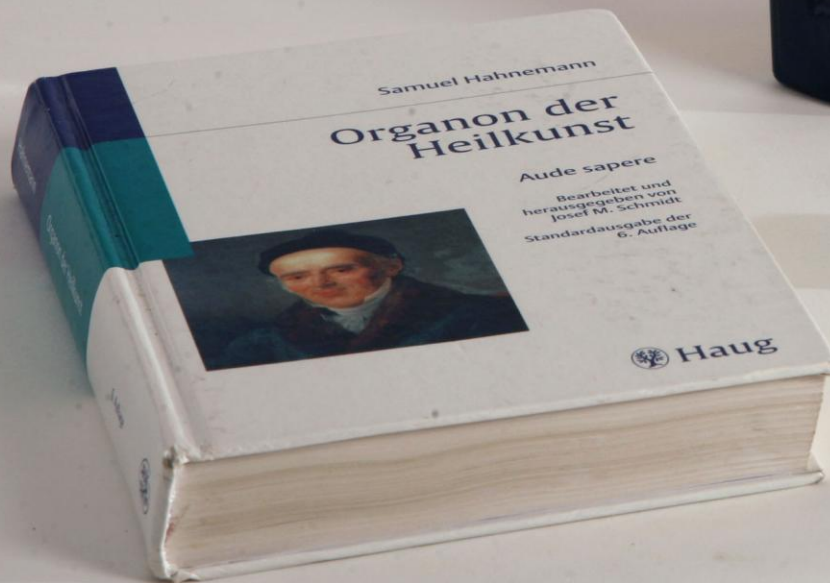

If we look at the uncovered rubrics we find out the following remedy :

Conium maculatum

- 2 months after the beginning of ***Arsenicum album Q 3 (LM3)*** we are confronted with the following situation:

In Organon 6th edition of Samuel Hahnemann we find the instructions on how to prepare and somministrare the Q-Potencies

The most important are 167, 246, 248, 270 und 280-28

The acute symptoms improved
considerably,

Now it's time for a complete case taking

Case taking of the 16.7.2007

- During the case taking (in this case 3,5 hours) we collected the totality of the symptoms in order to establish a ***plane of cure***, which aims are to find out
 - the ***acute*** remedies
 - the ***organotropic*** remedies
 - the ***constitutional*** remedies
 - the ***miasmatic*** remedies

Case taking of the 16.07.2007

- CHEST; NODULES; Mammae, in
- GENERALITIES; CANCEROUS affections; pain, to relieve
- EXTREMITIES; NAILS; complaints of; exfoliation

Repertorization and analysis

- The totality of the symptoms (**Paragraphs 5,6,7** of the Organon, VI. edition) has to be
 - 1) **repertorized**
 - 2) **analysed (paragraphs 153, 211)**
 - 3) and the result has to be **checked by the study of materia medica**

The plane of the cure

In our case we have found the following remedies that may be needed to complete the cure:

- 1. Acute: *Arsenic, (Bryonia)***
- 2. Organotropic : *Conium***
- 3. Side effects of therapy: *Phos, Arsenicum***
- 4. Constitutional : *Lycopodium***
- 5. Miasmatic : *Carcinosin (Thuja)***

Meaning of the plane of cure

- The remedy found are probably needed during the cure for healing, but always the law of the similar indicates when the time has come to change the remedy.

Given remedy and new symptoms

17.07.-21.07.2007

Arsenicum album

Q7

22.07.2007

Stop

Stitching pain in right axilla

The tumor is „restless“ - the patient is anxious

Flushes of heat with perspiration

Cough with tickling in pit of throat

Exfoliating nails

Repertorisation

COUGH; TICKLING; throat-pit, from (54)	2	1	1	1	1
GENERALITIES; CANCEROUS affections; glands (9)	3				

Control of the follow up

- In order to control the follow up we take all the symptoms, and we give the start number 10.
- If the patient ameliorate (30%) we write 7 ($10-3=7$).
- If the patient worsens (50%) we write 15 ($10+5=15$).
- In this way we have a very exact monitoring of the homoeopathic cure

Reaction to ***Conium maculatum***

- All the parameters ameliorate !

Acute episodes

- During the cure we often witness acute episodes.
- These acute cases are very important because they show us what the body needs at that moment. Therefore we repertorize very precisely every acute episode.

17.09.2007 - acute infection: symptoms:

Phosphorus C200

Follow up

„ After taking the remedy I got better very rapidly. The next day a menses started and lasted 5 days.

Ten days after the remedy i had avery bad headache, I suffer from Headche since the pregnancy of the second child.“

02.04.2009 **Placebo**

21.04.2009 **Phosphorus M**

29.06.2009 **Placebo**

26.08.2009 **Rhus tox C30** (the patient herself took this remedy without asking)

Follow up at 29.9.2009

*„Mrs. M. has died. At once my fear of recurrence appears again.
There are many people with cancer around me.
The anxiety isn't as strong as a year ago, but I think about it.*

*I think: other people succed in healing but I' don't. Like Mrs. M.
and other women I know. They are destroyed by chemotherapy
and I cannot help them. I have a sort of remorse that I'm dooing
so well.
If I'm occupied I don't think about the disease.“*

Arsenicum Album C200

14.12.2009 I'm well, only once headache
Placebo

09.02.2010 „The last time there is no more anxiety, I think my mind
is better“

A suppressed wart at the foot sole has reappeared.
Xanthelasma at the eyelids are coming out
From time to time I am having headache

Placebo

18.03.2010 I'm well, but the sternum pain are coming from time to
time

Conium M

Discussion

The patient with mamma cancer and many metastasis is free from tumors and metastasis since 2008, only by homoeopathic medicines.

There aren't signs of tumor growing.

The long lasting fear of a cancer recurrence has ameliorate a lot.

The general state is very well, the lady is looking for her family and work in her job.

GOD IS GREAT !

Discussion: The plane of cure

- As we had discussed in the beginning, the remedies needed has been:
 - - *Arsenicum album*
 - - *Conium maculatum*
 - - *Bryonia*
 - - *Phosphorus/Radium bromatum*
 - - *Lycopodium*
 - - *Carcinosinum*
 - - *Thuja*

Discussion

- **Arsenicum album** cured the mental shock
- **Conium** was the organotropic cancer remedy
- **Bryonia** cured the metastatic pleura infiltration
- **Phosphorus and Radium bromatum** the side effects of radiation and chemotherapy
- **Carcinosinum** the familiar cancer background
- **Lycopodium** the constitutional level

- Thank you for your attention !!
